

New Office in Germany to strengthen European Operation

PanJit Touch Screens, a leading edge design and manufacturer of high-end Touch Screens technologies, has opened an Office in Munich, Germany to drive the EU operation.

With this step to Europe, PanJit consequently follows its aim to serve its traditional market segments and applications, including:

- Military Notebooks/Tablets and GPS
- Industrial Control / Automation, IPC, Kiosk, Mobile Computing, Smart Phones &POS
- Medical

At the same time, PanJit Touch Screens proudly announces its newest technology driven developments:

- [Sunlight Readable Technologies](#) ⇒  EclipsTouch™
- [4, 5, and 8 wire interfaces](#) ⇒ All interface technologies from one hand
- [Glass/Film/Glass Technology](#) ⇒ Increased durability for your application security
- [Touch Window](#) ⇒ Customized Touch Screen solutions including design cover lenses
- [Touch Screen Controllers](#) ⇒ For a complete solution from one hand

PanJit optimizes and customizes the optical characteristics of the Touch Screen, by enhancing the polarized light transmission, color saturation and sunlight contrast, also reducing the natural light reflection.

PanJit offers a full range of customization solutions to meet your next project specifications. Our customization fees (NRE fees) are the lowest in the industry. Combined with our short design cycles and customization offerings, we can meet your project requirements in a timely basis.

Our goal is to assist you in making an informed decision about the best touch screen solution for your application.

Should you have any questions and/or require samples, pricing or additional information please do not hesitate to contact us directly.
